

CAPABILITY STATEMENT 2026

Energy Harnessed by the Sun

Senior Technical Intelligence for Renewable Assets

"Don't pay for the logo. Pay for the expertise that delivers."

 Spain  Italy  Germany  Turkey

Who We Are

We are a specialized technical task force founded by former Senior Experts from **DNV, AFRY, Bureau Veritas and Major EPCs**. We bridge the gap between "Corporate Consultancy" (too slow) and "Local Contractors" (too risky).

Vision:

To accelerate the global transition to renewable energy by providing innovative, reliable, and sustainable services.

Mission:

To empower businesses and communities to invest in renewable energy, reduce their carbon footprint, increase profitability, driving sustainability, achieve energy independence and profitable projects through expert consultancy.

Proven Success

Why Smart Money Chooses YellowWatt

The "Big Firm" Model

Junior Teams: Work done by grads, signed by seniors.

Slow Turnaround: Weeks for a simple report.

Generic Advice: Standard checklists.

High Overhead: You pay for their office.

The YellowWatt Model

Senior Execution: Work done by the experts you hired.

Deal Speed: "Red Flag" Reports in 72 hours.

Actionable Intel: We quantify the fix.

Lean & Agile: You pay for value.

Detailed Services 

Providing turnkey solutions for the whole renewables life cycle from development to decomposing in the level of rooftop and utility scale.

Project Development

From the first site visit to the final permit, we navigate the regulatory maze for you.

- ✓ **Feasibility & Tech:** Site visit, Technology evaluation, Civil & Electrical Design, Energy Production Assessment
- ✓ **Legal & Land:** Land right agreements, Contract review, Risk and mitigation lists.
- ✓ **Permitting:** Environmental and permits, Interconnection review.
- ✓ **Financial:** Project specific Financial modeling, Bidding support & contractor evaluation.

Engineering Services

Providing turnkey solutions for the whole renewables life cycle from development to decomposing in the level of rooftop and utility scale.

Design & Feasibility

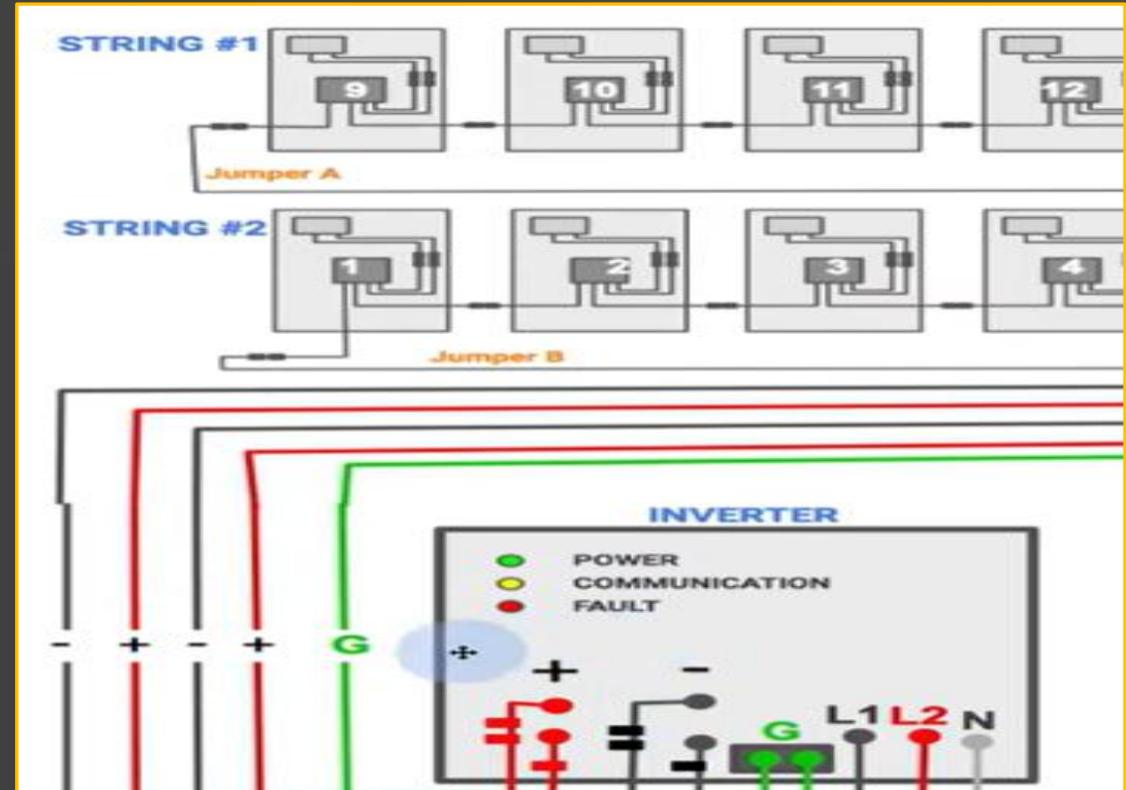

Preliminary design, Site assessment, Energy Production Assessment (EYA/EPA), Technology evaluation.

Grid & Financial

Interconnection agreements, Financial Modeling (CAPEX, OPEX), Environmental impact studies.

Life extension

Revamping and Repowering

The "Watchdog" for Buyer & Vendor

- ✓ **Bidding/Contracting support & contractor evaluation**
- ✓ **Construction Phase:** Constructional monitoring, Acceptance supervision, Site evaluation.
- ✓ **Quality Assurance:** Manufacturing inspection, FAT (Factory Acceptance Test), SAT (Site Acceptance Test).
- ✓ **Testing:** Test supervision, Inspections of general conditions, Performance evaluation.
- ✓ **Operational:** SCADA analyses, Root Cause analyses, Repowering/Revamping assessments.

Access to Deal Flow in EU & Turkey

We leverage direct access to major developers to source and secure sustainable projects that match your investment criteria.

- ✓ **Project Sourcing:** Identifying assets from Greenfield to Ready-to-Build (RTB) and Operational stages.
- ✓ **TDD Support:** Leading the Technical Due Diligence process to de-risk acquisitions before closing.
- ✓ **Contracting Support:** Expert advisory during EPC negotiation and contracting post-acquisition.
- ✓ **Operational Oversight:** Continued technical support throughout the project operation to ensure target ROI.

Technical Due Diligence

Review & Audit

- ✓ Red flag analyses & Risk mitigation lists
- ✓ 3rd party report reviews
- ✓ VDR (Virtual Data Room) advises
- ✓ Contract Reviews (EPC, O&M, Land, Grid)
- ✓ Site assessment
- ✓ Root cause analyses
- ✓ Design, Technology, Land rights,

Technical & Financial

- ✓ Energy Yield Assessment (EYA) review
- ✓ Financial model CAPEX & OPEX verification
- ✓ Grid connection & Land right review
- ✓ Environmental and permits status check

Project Management & Financial

Investor-Centric

We act as your eyes and ears for opportunities. We tailor financial, legal, and tax due diligence to market dynamics.

Navigating Regulations

Expert handling of local permits for seamless investment. We bridge gaps for regional ventures.

Local Presence

Establish local entities to cater to investor needs. Trustworthy ally for peace of mind in foreign investments.

Asset Management & O&M

Integrating expert design, flawless implementation, and performance optimization ensuring long-term success.

- ✓ **Operations:** Optimize operation, global O&M partner.
- ✓ **Performance:** Operational monitoring, Performance Monitoring.
- ✓ **Supply:** Supply management, Technology Evaluation.
- ✓ **Lifecycle:** Decommissioning, Repowering (improving capacity), Revamping (restoring capacity).

Signature Projects

Detailed project reference list

Selected trusted owner engineer parent for EU investment funds

Project development in Spain, Italy and permit procedure for a roof-top commercial building.

Romania 1 MW unlicensed solar SPP - Ongoing

More than 500 MW Full Due Diligence Including Technical, Legal, Financial and Tax for investment funds

You Through Every Phase, From Project Conception to
Lifelong Excellence**

YellowWatt - About Us

YellowWatt

Energy Harnessed by the Sun

Senior Technical Intelligence for
Renewable Assets

info@yellowwatt.com

Your dedicated partner in revolutionizing renewable energy. Specializing in sustainable and bankable solar photovoltaic projects, we deliver clean, renewable, and affordable energy solutions for investors and consumers.

With a proven track record, our team has successfully evaluated, developed, constructed, and financed over 1 GW of renewables projects globally. Beyond project numbers, we're committed to effective environmental, social, and corporate governance, aligning every endeavor with sustainability goals.

We transcend traditional project development. Our focus on comprehensive project management includes technical due diligence, EPC, and local presence establishment to cater to investor needs. Prioritizing these aspects, we create a holistic approach that exceeds industry standards. Join us on our journey toward a yellower, greener, more sustainable future. Discover the power of solar energy with **YellowWatt**. Explore more at www.yellowwatt.com
